HME SIGNATURE SERIES DOVE MATTRESS

INDIVIDUALIZED CARE & COMFORT

CREATED FOR STABILITY & COMFORT

The HME Signature Series Dove Mattress is designed to prevent and manage skin injuries using alternating pressure and micro low air loss technologies exclusively designed in Canada for HME Home Health. With its 'Quick-Start' feature, it requires little set-up and maintenance and is ideal for all patient care environments. Created by HME's clinical team based on client and industry feedback and auditing all other mattresses available in the market, our team believes that the HME Signature Series Dove Mattress is the ideal choice for any user managing pressure wounds for any age from pediatric to geriatric users.

The surface offers protection and comfort through its contoured cell design, 8" surface height and static head section. The HME Signature Series Dove Mattress has an intuitive control panel, and 3 therapeutic modes for individualized client care and comfort.

Micro Low Air Loss:

Constant flow of air to maintain constant temperature and humidity.

Quick-Start:

Sets the optimal pressure and eliminates the need for caregiver adjustments.

8" Surface Depth:

Designed for use with most homecare and hospital beds and side rails.

EasyCover:

Cover easily removed for cleaning/disinfecting and can be laundered. Ease of cleaning ensures infection protection.

Automatic Auto Fowler:

Adds extra air to support the hips and lower back when the head of the bed is raised above 30 degree angle.
